

ENVIRONMENTAL

RÖHM GMBH

OCTOBER 2021

Foreword

RÖHM GmbH has set itself the explicit goal of acting in the best interests of our environment in all its commercial activities, and thus to making a significant contribution to environmental protection.

To achieve this objective, we have defined the environmental guidelines set out below as a binding component of our business policy:

- We comply with all laws and requirements relating to the environment.
- The design of our production plants and processes are intended to be environmentally optimized.
- We view economical use of resources as our social obligation.
- We use energy economically and actively reduce greenhouse gas emissions.
- We use water economically and carefully.
- We aim to prevent or reduce to a minimum all environmental pollution such as garbage, waste water, emissions, and noise.
- We aim to prevent air pollution. The design of our production technology supports us in this aim.
- We use chemicals and hazardous substances economically and with the utmost care. All substances are recorded as part of our hazardous substance management system.
- We are committed to balancing environmental and economic considerations.
- We manufacture environmentally friendly products and consider their entire life cycle.

We want to achieve these goals in conjunction with our business partners, especially our customers and suppliers, and thus make our contribution to environmental protection and sustainability.
